

Real Estate Annual Valuation Worksheet

IMPORTANT INFORMATION FOR CLIENTS AGE 72+ OR INHERITED IRA OWNERS

Automated valuation models (AVMs) - The independent firm we have engaged, as well as some of the valuation sources listed within this document such as third-party valuation websites utilize automated valuation models (AVMs) to derive a value. AVMs use statistically based computer programs that use real estate information such as comparable sales, property characteristics, and price trends to provide a current estimate of market value for a specific property. For individuals who are required to take mandatory distributions (RMDs) from an IRA or retirement account, we encourage you to seek guidance from your tax professional about how that estimated value from the AVM may impact your RMD calculation. You may need to adjust your calculation. Please consult with your tax advisor.
